USA SERVICE & SUPPORT

Global Gauge, headquartered in Dayton, Ohio, stands out for our ability to assist customers in our sector through in-house production of crucial sensors and a design philosophy that favors non-proprietary components whenever feasible. Our gauging systems, renowned for their reliability, supportability, and minimal life-cycle costs, are unrivaled worldwide.

OUR SERVICES

In addition to new systems, we offer upgrades to systems containing obsolete PC or PLC components, electronics cabinets, and other critical system components while allowing our customers to retain their functioning frames to save on installation cost and downtime.

INNOVATIVE DESIGN
Our unique generator design improves overall gauge performance and reduces down time

24/7/365 SUPPORT
Our team is dedicated to providing best in class customer service to support our systems

MAINTENANCE
Our products are designed to last, reducing the overall total cost of ownership
